Education

Ain Shams University (ASCIS), Cairo, Egypt

Bachelor of Science in Computer Science — Specialization in Scientific Computing

GPA:3.2 (Class of 2026)

Work Experience

Petrojet Company — IT Department Intern

Summer 2025

- Supported the IT department in system maintenance, troubleshooting, and network operations.
- Assisted in software installation and configuration, improving overall system efficiency and user support.

Open Source Community (OSC) – Ain Shams University — Linux Team Member

2023 – 2024

- Assisted in organizing workshops and training sessions on Linux operating systems, command-line usage, and open-source tools.
- Gained hands-on experience in Linux system administration and troubleshooting.
- Collaborated with faculty teams on technical projects, enhancing problem-solving and teamwork skills.

Key Projects

EpiDetect (Epileptic Seizure Detection Dashboard)

- Built a multi-user doctor portal using React for processing and visualizing EEG signal readings.
- Implemented secure role-based access control to separate patient data views per individual doctor.

Online Wallet System

- Developed an online wallet system using efficient data structures to manage accounts, transactions, and balances.
- Supported features like account creation, balance queries, and transaction handling (Used C++ for backend development(Used C++ for backend development and appropriate data structures) .

Bank Management System

- Designed and developed a banking system with separate modules for admins, clients, and employees (Java group project).

FOS (Operating System Project)

- Contributed to kernel development, including dynamic allocation, page fault handling, and semaphores.

Speaker Identification System

- Developed a system that identifies speakers using MFCC feature extraction and Dynamic Time Warping (DTW) with and without pruning.
- Implemented Sakoe–Chiba band pruning to improve DTW efficiency and reduce computation time.

Skills

Programming Languages: C/C++, C#, Python, **Tools:** Git, Linux

Java, SQL

Frameworks: Spring Boot, Docker

Concepts: Data Structures, Algorithms, Object-Oriented Programming (OOP) with Java, Operating Systems, Computer Networks ,Databases
